

# 1

You need an email address to register an account on [my.technovationchallenge.org](http://my.technovationchallenge.org). Each account requires a unique email address.

Steps to register:

1. Go to <http://technovationchallenge.org/>
2. Click on Sign-up, then read to agree to conditions.
3. Confirm your location, enter your date of birth, choose your profile, and submit information about your school.
4. Provide your email and password. Once you click next, it will bring you to a sign in page.
5. Once you confirm your profile, you will be registered.
6. From your dashboard you see a list of items to get done before you can join a team as either a student or a mentor.

## register

# 2

Students are asked to provide their parent/guardian names/email addresses when registering at [my.technovationchallenge.org](http://my.technovationchallenge.org).

After the registration has been submitted, an electronic consent form will be emailed to the parent/guardian to sign electronically.

If parents do not have regular email/internet access, the consent forms can also be downloaded—ask your Lead Mentor.

## get consent

# 3

After all team members have registered individually and submitted their consent forms on [my.technovationchallenge.org](http://my.technovationchallenge.org), **ONE** team member needs to create the team. (This can be done by any student team member, or by the team's mentor)

The team member who created the team can invite other students to join from the team page using student email addresses.

Mentors and other team members can also search for the team and request to join that team.

Any team member who is already accepted can approve others' requests to join a team.

## create team
